

Release Notes EN RTW TMR7 | TMR7OEM Firmware 8-05

Software version: rtw-tm-fw-8-05.bin

Build Date: August 26th, 2021

NOTE – Copy the file to an USB flash drive. The USB flash drive shall be correctly unmounted. Not until then remove it from your computer and insert it into your TouchMonitor.

ATTENTION! – Disconnecting WITHOUT unmounting may damage the copied file and thus may cause malfunctions after update!

Release Notes Firmware 8-05

Updates

- A security vulnerability on the network interface has been closed.
- A license file (LF) for activating purchased licenses can now be loaded into the TouchMonitor from the root directory of the USB storage medium in addition to the folder "/rtw/licence".

Notes

License problem with SW20014 fixed in firmware 6-20

Problem

With previous versions, the Chart instrument included in **SW20014 Logging Data Server** license could be launched without the presence of the appropriate license.

Presets using the Chart instrument without the activated license cannot be launched any more with firmware 6-20 and higher. It does not matter, if the Chart instrument is visible on the display or not, it is just enough, if it is added to one of the Audio Groups of the preset.

Workaround

1 | If you want to use the Chart instrument furthermore, it is mandatory to order and install license SW20014.

2 | If it happened accidentally, it is necessary to clear the Chart instrument from the Audio Groups in the preset before it can be launched.

How to remove:

- Touch **Menu** on the Control Bar
- Touch **System** in the main menu
- Touch **Special** in the Control Bar
- Touch **Demo** and select **on**
- Touch **Save** to save and exit

Now you can load all the presets which could not be launched before because of one or more included Chart instruments.

- Touch **Menu**, then **Preset Management**
- Select a preset including the Chart instrument
- Select each Audio Group to remove the Chart instrument (If you are not sure, which Audio Groups include the Chart instrument, touch **View** to see an overview)
- Touch **Delete Instrument** in the Control Bar
- Touch **Loudness Chart** on the right
- Touch **Done** to get back and to select another Audio Group (if available)
- If all Audio Groups are cleared, touch **Save** to save the modified preset
- Repeat this procedure with all presets which could not be launched because of missing the SW20014 Logging Data Server license.
- When done for all presets, touch **Menu** again, then **System** and **Special**
- Touch **Demo** and select **off**
- Touch **Save** to save the configuration and to exit

By now, all presets should work as expected.

Release Notes Firmware 8-04

Notes

SW20008

- Failures in LQL operation have been fixed and the functionality has been improved.
